
(Robert Grow, Envision Utah, rgrow@envisionutah.org)

THE FOUR STRATEGY QUESTIONS:

(1) What do you want to happen?

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

(2) Who can make it happen?

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

(3) What message do they need to hear?

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

(4) Who should deliver the message?

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

Step 1: What do you want to have happen?

(1) What does your community need or what are you concerned your community will lose? What is your number 1 issue you want to advance with your grant?

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
Step 2: Who Can Make it Happen?

and

Step 4: Who Should Deliver the Message?

WHO ARE THE STAKEHOLDERS AND CHAMPIONS FOR YOUR PROCESS? WHO CAN MAKE THE PROCESS SUCCEED? WHO NEEDS TO BE INVOLVED NOW TO IMPLEMENT LATER? (Remember stakeholders from or for underrepresented populations.)

1) Stakeholders:
   a) Respected, trusted and well-known citizen leaders.
   b) Individuals committed to an honest, open, and fair evaluation of the issues.
   c) Representatives of those who will be affected (positively or negatively) by the outcome of the process. (A Stakeholder group is not a coalition of those who have a common agenda but a collaboration of all affected parties.)
   d) Representatives of those who can implement the outcome of your process.
   e) Who are some of your Stakeholders? Who are you missing?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

2) Champions:
   a) Those who will be “public face” of the process and deliver the message.
   b) Which of your Stakeholders are Champions?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
Step 3: What message do they need to hear?

A. Framing Your Issues with Scenarios
   1. A scenario is the story of a possible virtual future; it shows what life may be like some day.
   2. In scenario planning we compare different possible futures (not the present circumstances to one possible future).
   3. Scenario planning has a selected time horizon (10, 25, 50 years).
   4. All scenario planning can be stated as alternative “if/then” statements.
      Ex: If we do this now, then the future may be like...
      If we do not do this now, then the future may be like...

B. Framing Your Community’s or Region’s Primary Issue as Scenario Alternatives:

IF we do ____________________________ THEN ____________________________
                   ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________

IF we do not do_______________________ THEN ____________________________
                   ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________
                                          ____________________________

How would you frame the issue differently for underrepresented populations?
C. Inviting Stakeholders Using Your Community’s Values (“Your Elevator Speech”):

We are initiating a process to solve the following problem......................

(Describe the process: Who’s in? Budget? Scope? Geography? What is the goal? Schedule? Committing to a process not a specific outcome. Open, inclusive, public, transparent, etc.)

(Use a Positive Values Ladder)

(1) **IF** we work together and solve this problem, things will get better in our community or region in the following specific ways ............
(2) Specifically, our lives, and the lives of our children and grandchildren, will be better because....... (describe the possible positive future conditions)
(3) This will enrich, improve and strengthen our community because............
(4) **IF** we do this together we will feel.............

(Use a Negative Values Ladder)

(1) **IF** we stay fragmented and do not solve this problem, things will only deteriorate and get worse in the following ways..............
(2) Specifically, our lives, and the lives of our children and grandchildren, will be worse because............(again, describe the possible negative future conditions)
(3) This will impoverish and weaken our community further because............
(4) And we will feel................

We need your involvement and leadership to help solve this problem now. You can make a real difference because .......... Will you join us?

Who else can you help us bring to this effort?
(How would you invite a stakeholder for or from an underrepresented population differently?)
VALUES LADDERING TEMPLATES

(Positive and Negative)

1. Now, for you personally, I’d like to know what you consider the most important attribute of living in your community and region to be. Complete the phrase:
   
a. To me the single most important thing or benefit about living in my community or region is ...

   __________________________________________________________

   __________________________________________________________

   __________________________________________________________

   b. Specifically, how does having this thing make my life better? (How is it a benefit to you personally as you live in your community or region?)

   __________________________________________________________

   __________________________________________________________

   __________________________________________________________

   c. Why is having that in my life so important? (What emotional reward do you get from that benefit? And when you have that emotional reward, how does that make you feel?)

   __________________________________________________________

   __________________________________________________________

   __________________________________________________________

   d. And, ultimately, that is important to me because it gives me a sense of . . .

   __________________________________________________________

   __________________________________________________________

   __________________________________________________________
2. Now, for you personally, I’d like to know what you consider the most negative attribute of living in your community and region to be. Complete the phrase:

a. To me the single biggest disadvantage or worst thing about living in my community and region is ...

______________________________________________________________________________

______________________________________________________________________________

______________________________________________________________________________

b. Specifically, how does this thing make my life worse? (Why is having that in your life so negative?)

______________________________________________________________________________

______________________________________________________________________________

______________________________________________________________________________

c. What emotional penalty do I get from that disadvantage? And when you have that emotional penalty how does that make you feel?

______________________________________________________________________________

______________________________________________________________________________

______________________________________________________________________________

d. And, ultimately, that disadvantage and its emotional penalty give me a sense of . . .

______________________________________________________________________________

______________________________________________________________________________

______________________________________________________________________________
