

*Sustainability isn't about great big things. It's about the small things that fit together to make a big difference.*

# Sustainability, to me, means...

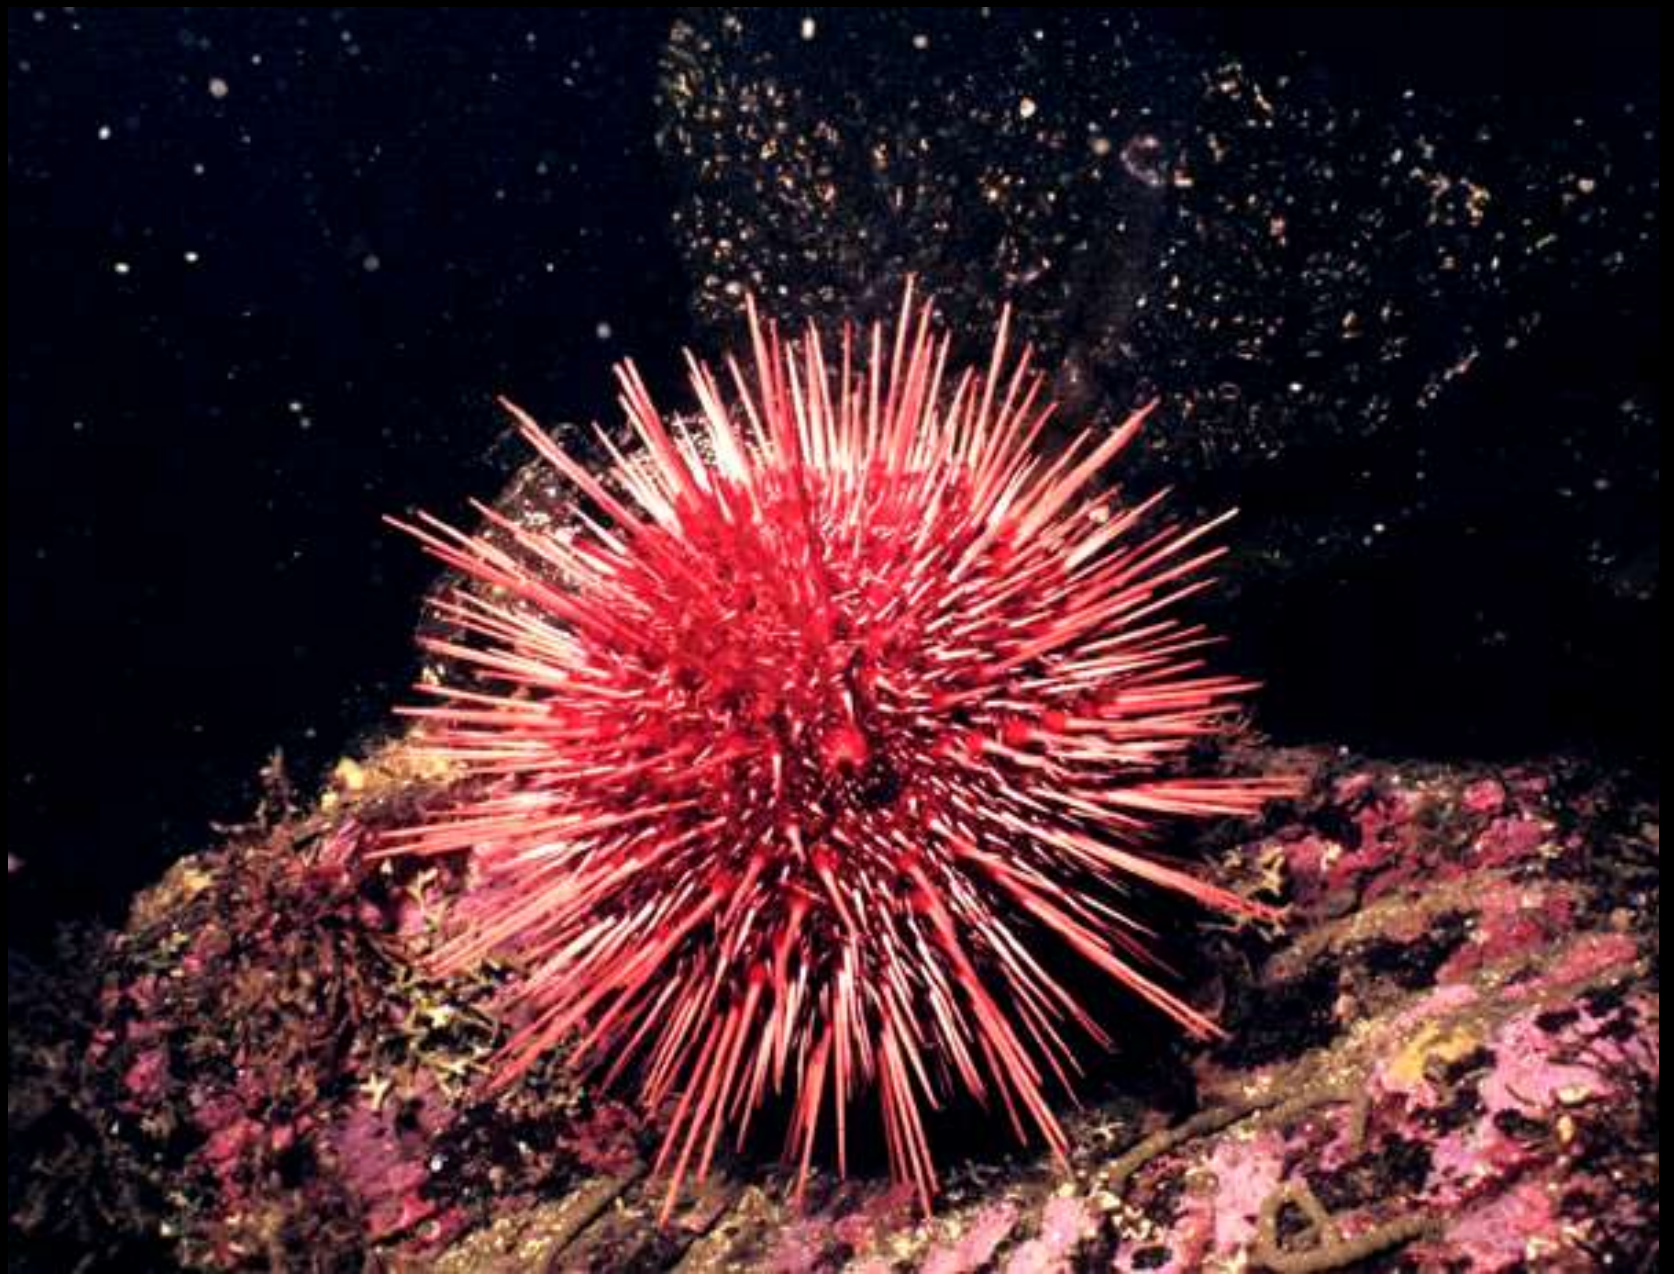

- a thoughtful approach to how we use, develop and steward the land
- that everyone has access to
  - safe and affordable housing
  - a job that meets their basic needs
- our rivers run clean
- the air is not toxic
- we have land to grow and harvest food
- we think of our impact on future generations

GEOFF DORE #naturepl.com

“A Sustainable Community is...

An urban, suburban or rural community that has more housing and transportation choice, is closer to jobs, shops or schools, is more energy independent and helps protect clean air and water.”

“Take care when choosing your first employer.”

“Now it’s the age for the translator. It’s the age for the bridge builder. It’s the age for Velcro. It’s the age for Lego. It’s the age for combining what we already have into what we need.”
