Innovation

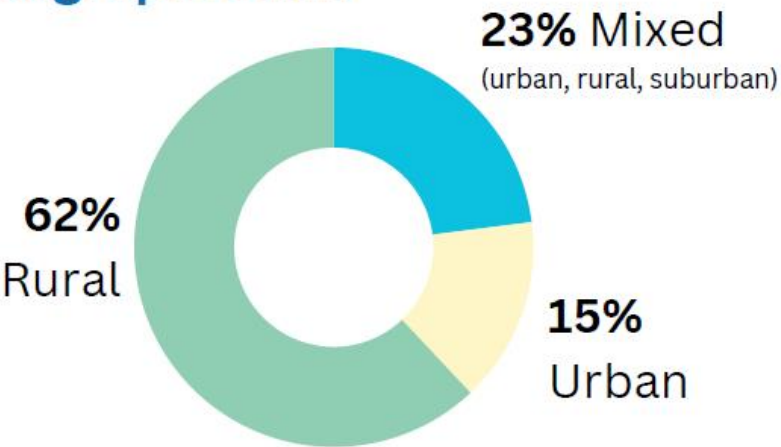

# 65 Fellows, 65 Catalytic Projects, 42 States, 2 Territories

ERC Fellows are working alongside Host Organizations in communities large and small, including nine Tribal Nations, two U.S. territories, and 5 multi-state collaboratives.

## Geographic Mix

## Fellows

65% 10+ years of experience

69% Women

54% Identify as a person of color

40% Come from host community or region

## Projects

Broadband

Housing

Childcare

Downtown  
Revitalization

Technology  
& Innovation

Workforce  
Development

Tourism &  
Recreation

Sustainability  
& Climate  
Resilience

Small business,  
Entrepreneurship,  
Access to Capital

Transportation &  
Infrastructure

## Host Organizations

- City and county governments
- Regional coalitions and partnerships
- Tribal Nations
- Economic development organizations (EDOs)
- Economic Development Districts (EDDs)
- Entrepreneurial support organizations
- Community Development Financial Institutions (CDFIs)
- Nonprofits and technical assistance providers

Serving Avoyelles, Catahoula,  
Concordia, Grant, LaSalle,  
Rapides, Vernon and Winn  
Parishes

ERC project: Support the  
development of a center of  
resilience in the central Louisiana  
region

Largest community:

1. Alexandria, LA 44,000
2. Pineville, LA 14,100
3. Leesville, LA 5,500

2016-2023: 14 federally-declared  
disasters

Additionally, central Louisiana  
serves as evacuation route for  
coastal events and ingress route  
for disaster response efforts

# Bridging the Digital Divide

Tackling Digital Access, Equity, and Resilience Through Broadband Connectivity

# Broadband Definitions

Digital Access, Equity, Communication... what does it mean?

# Broadband (short for “broad bandwidth”)

Bandwidth: the capacity of a network connection to transmit data

Broadband: high-speed internet connection that offers increased data transfer rates

# Broadband Infrastructure

Backbone, middle mile, and last mile systems

### Long-haul Fiber

Transmission over optical fiber cable for great distances

### Back-haul Fiber

Intermediate links between the core or backbone network and the small subnetworks

### Fiber Distribution Hubs

Enclosures where bundles of fiber are separated into smaller bundles of "access fiber"

### Fiber Ring

Backbone of the fiber system, built to provide redundancy

### Regeneration Facilities

Built along the fiber system to house fiber cables and devices to send and receive

### Backbone

Large-capacity fiber

### Middle Mile

Segment of fiber system linking core network to the local fiber

### Last Mile

Fiber network connects to end-users

# Digital Access

Do you have what you need to participate in a digital society?

# Digital Access

Having what you need to participate in a digital society, including connectivity, devices, skills, knowledge, and support

# Digital Equity

(NTIA) Measurable objectives to promote:

1. the availability and affordability of access to broadband technology;
2. online accessibility and inclusivity of public resources and services;
3. digital literacy;
4. awareness of online privacy and cybersecurity; and
5. the availability and affordability of consumer devices and technical support for those devices.

# Digital Literacy

Celise Reech-Harper, MSIS: Competency in technology, access and communications that allows the individual or group to complete all tasks necessary for an unencumbered life

(ALA) The ability to use information and communication technologies to find, evaluate, create, and communicate information, requiring both cognitive and technical skills.

# Inclusion

Who is in the room and who isn't?

# Digital Inclusion

(NTIA) Individual- and community-level access to robust broadband connections; Internet-enabled devices that meet their needs; and the skills to explore, create and collaborate in the digital world.

# Digital Resilience

Heather Smoak-Urena, CECD: Ability to create incremental changes that serve the dynamic needs of a local and regional community.

# Digital Communication

How do we approach tech and broadband conversations. Are they approachable? Are they technical? Are the understandable? Are they welcoming?

# Example: What is bandwidth?

1. A measurement indicating the maximum capacity of a wired or wireless communications link to transmit data over a network connection in a given amount of time (TechTarget)
2. The data transfer capacity of a network in bits per second (Investopedia)
3. The maximum amount of data transmitted over an internet connection in a given amount of time. Bandwidth is often mistaken for internet speed when it's actually the volume of information that can be sent over a connection in a measured amount of time (Verizon)
4. The amount of data that can be sent from one point to another in a certain period of time (Kiddle Search Engine)

# Broadband in Louisiana

A very abridged history of twenty years of broadband development in central Louisiana

# 1990's Broadband Efforts

- Barriers:
- 1996
  - Several communities were unable to get universal telephone service
  - Municipality offices has telephone service but could not have a second phone line for a fax machine
  - Agency office struggled with dial up connectivity that was very limited
- Successes:
  - Agency was able to make emails for each staff instead of sharing two for the office
  - 1999: Last community gained universal telephone service

# 2000's Broadband Efforts

- 2007
- Projects
  - Delta Regional Authority's Delta Leadership Institute
  - Goal: build a toolkit to educate communities about emerging technologies and to assess their needs and engage service providers effectively

# 2010's Broadband Efforts

- 2016
- Projects:
  - Collaboration between Kisatchie-Delta Regional Planning & Development District and North Delta Planning & Development
  - Goal: promote broadband awareness and adoption in metro-adjacent rural areas

# 2020's Broadband Efforts

- 2020
- Barriers:
  - State law prohibiting municipalities involvement in developing broadband infrastructure
- Opportunities:
  - Leslie Durham, Louisiana Governor's Designee for the Delta Regional Authority, recognizing need to prioritize broadband
  - Planning districts' white paper defining strategies for a better Broadband Map
  - Granting Underserved Municipalities Broadband Opportunities (GUMBO)

# Three pillars to broadband outreach

Awareness, acceptance, and adoption

# Broadband in Vidalia, LA

The Story of a Community Champion

# A Champion to Drive the Project Forward

- An employee of the city of Vidalia, LA (pop 3,897) who was a former cable company employee
- Role:
  - Build capacity of the town's broadband through knowledge
  - Investment in fiber
  - Prioritizing redundancy in infrastructure
  - Supporting public agency's bandwidth
  - Collaborating with the EDD
  - Willing to support any local community understand their broadband needs and opportunities

# Inclusion and Equity

My role in this story

# CENLA Broadband Regional Priorities

1. Access to connectivity
2. Adaptability and sustainability
3. Affordability
4. Digital Literacy, Education, and Security

## CENLA Broadband REGIONAL PRIORITIES

In the regional discussion around broadband hosted by Kisatchie-Delta Regional Planning & Development District, we have determined that these are the concerns and priorities for our region.

1

### Access to connectivity

The most important component of broadband and internet is connectivity, meaning having the ability to access internet that has both speed and bandwidth to get things done.

2

### Adaptability and Sustainability

Internet is here to stay, so all regional solutions for broadband access need to be long-term, sustainable solutions that are able to adapt to changing technologies.

3

### Affordability

Once you have internet connection, the next question is affordability. Solutions need to be affordable, so our communities have the access for school, work, health care, and more.

4

### Digital Literacy, Education, and Security

Once you have internet, it is essential to know how to use it safely find, evaluate, create, and communicate information. This is both a literacy and a technical skill.

# LET'S TALK ABOUT BROADBAND

HELP US CREATE AN EFFECTIVE  
STATE-WIDE CONVERSATION  
ABOUT CONNECTIVITY

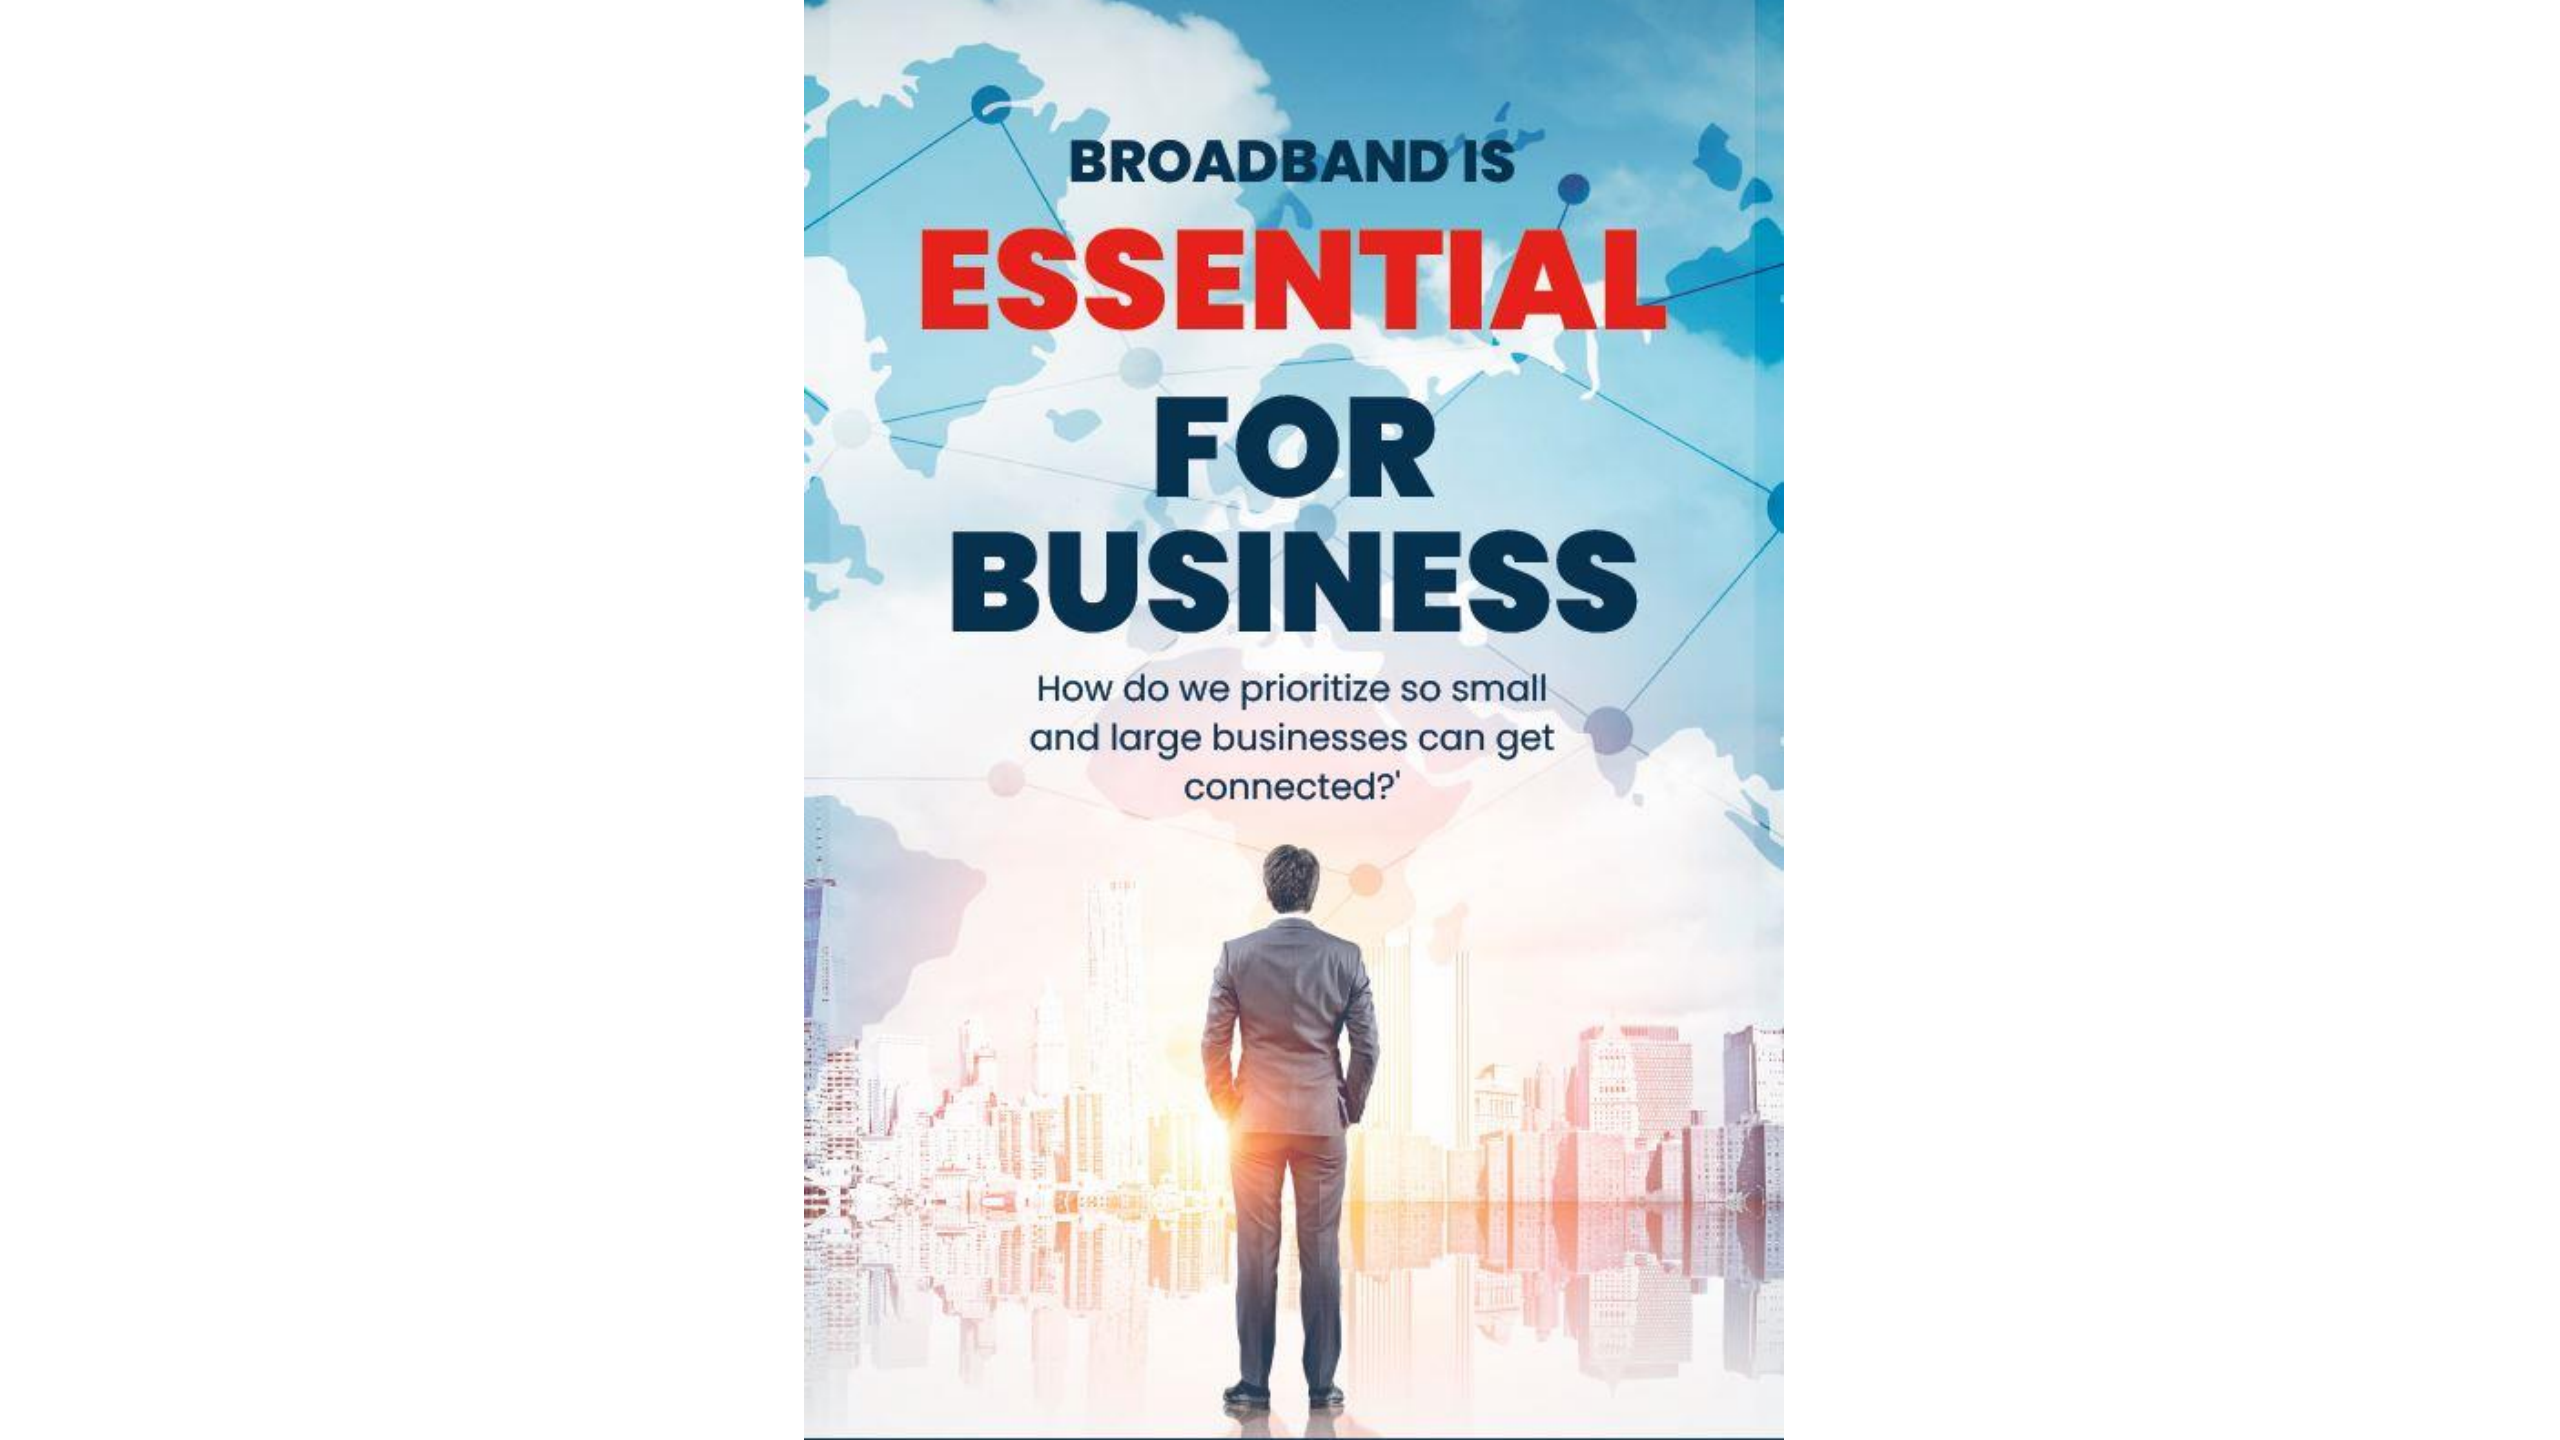

**PART OF BROADBAND  
MEANS EVERYONE CAN  
CONNECT TO THE  
INTERNET.**

**WHAT DOES IT MEAN TO BE DIGITALLY  
LITERATE?**

# **BROADBAND IS ESSENTIAL FOR BUSINESS**

How do we prioritize so small  
and large businesses can get  
connected?'

Our schools and  
libraries depend on  
broadband  
connectivity

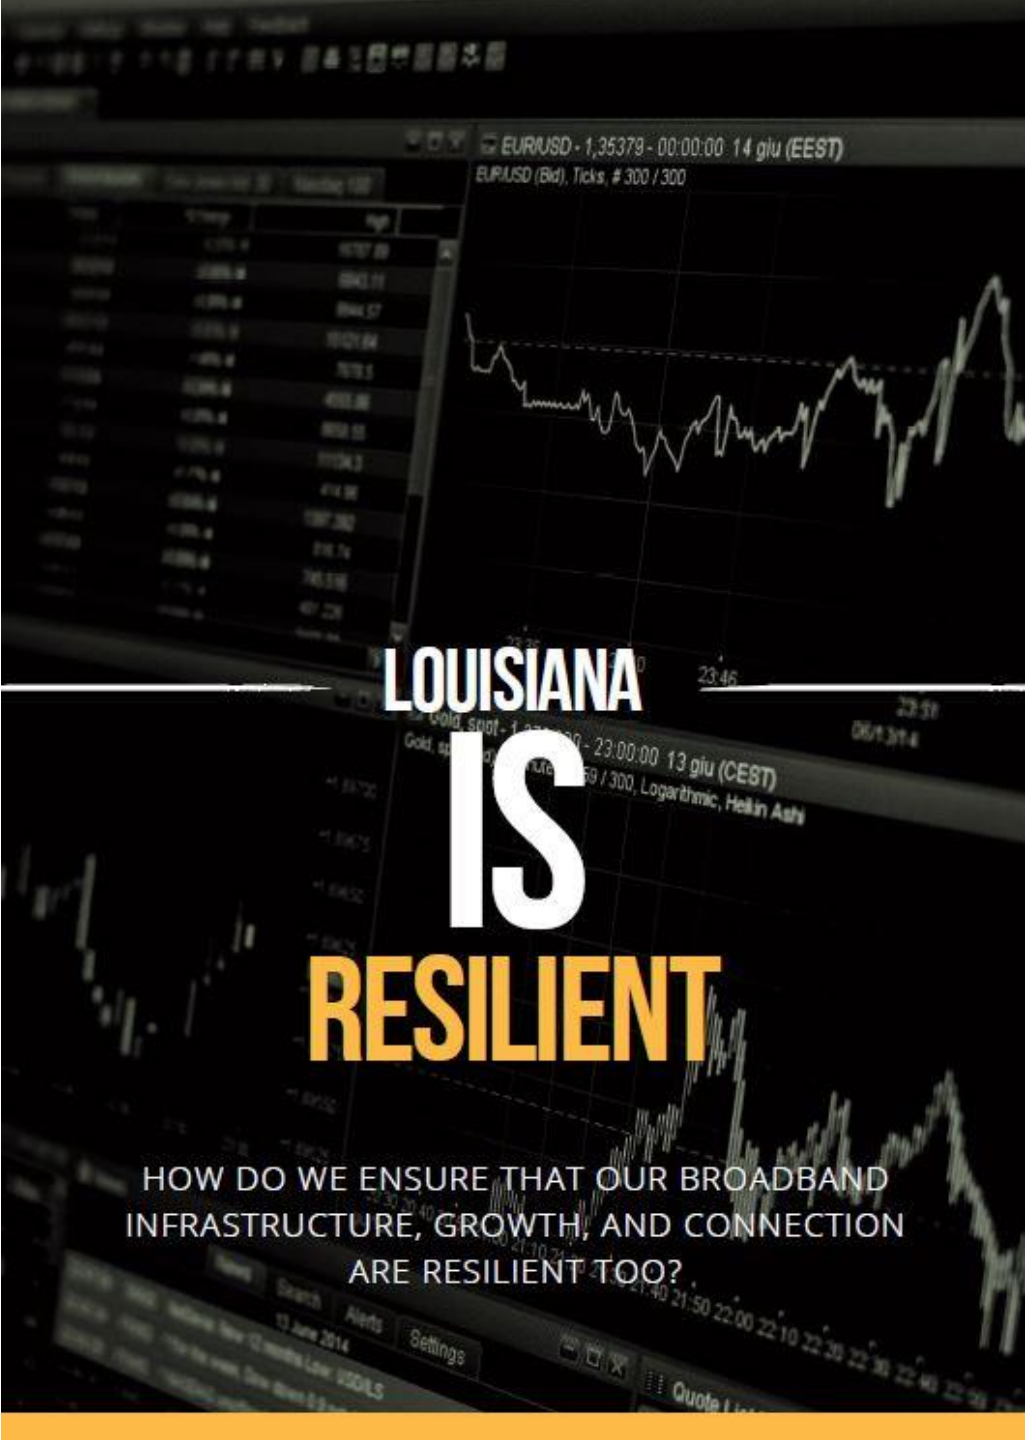

How do we include them in our plans and priorities?

# LOUISIANA IS DIVERSE

How do we make sure that our  
Broadband connectivity reaches  
everyone equitably?

The background of the slide features a collage of financial market data. At the top, there's a table with columns for 'Symbol', 'Last', 'Change', and 'High'. Below it, a line chart for 'EURUSD' is visible, showing price fluctuations. Another chart for 'Gold' is partially visible at the bottom. The overall theme is financial markets and data analysis.

# LOUISIANA IS RESILIENT

HOW DO WE ENSURE THAT OUR BROADBAND  
INFRASTRUCTURE, GROWTH, AND CONNECTION  
ARE RESILIENT TOO?

# CENLA Regional Stakeholder Meeting

**October 26th, 2022**

**2 pm - 4pm**

**516 Murray St, Alexandria, LA 71303**

Join us in discussing digital equity in the Louisiana Broadband Initiative  
as it applies to Central Louisiana and

Avoyelles, Catahoula, Concordia, Grant, LaSalle, Rapides, Vernon and Winn Parishes.
